

CHANGE bug bounty

We are taking utmost care of users' funds and data security. In order for the community to help us maintain the highest standard of security, we've created a bug bounty programme. Under this programme, we kindly ask our community members to help find vulnerabilities and report them to us.

If a vulnerability is found, then please report the vulnerability by sending an email with a detailed description of the bug and an attack scenario to bugbounty@getchange.com. A team member will get back to you to assess the report and determine the size of the reward. Rewards will be paid in CAG tokens.

Rewards are the following:

- High risk: up to **10000 CAG**
- Medium Risk: up to **5000 CAG**
- Low risk: up to **1000 CAG**

Assessing the risk level of a bug or security risk report is in full discretion of the Change team.

Thanks,
Change team
